CLARENZ JOHN T. IBAYA

Full-Stack Mobile & Web Developer
San Rafael, Bulacan, Philippines

PROFESSIONAL SUMMARY

BS Information Technology student specializing in Mobile and Web Application Systems, with project experience in Flutter, React, Next.js, PHP, and Supabase. Builds mobile and web applications with offline synchronization, relational databases, role-based access, and cloud deployment.

ACADEMIC PROJECTS

Tinig Turo - Educational English LMS App | *Lead Developer* | *Flutter, Next.js, Supabase*

- Built a reading-fluency system with a Flutter mobile client for elementary students and a Next.js teacher portal.
- Implemented offline session storage and retry queues for Supabase synchronization, PostgreSQL row-level security, teacher access controls, gamified learning, and student progress dashboards.

FairPlay - Event Scoring & Tournament Management | *Full-Stack Developer* | *Web & Mobile*

- Developed event scoring, tabulation, and tournament management features; designed system architecture, ERDs, and relational database schemas using MySQL/Supabase.
- Prepared an ISO/IEC 25010-based system evaluation instrument and connected GitHub repositories to Vercel for deployment.

SafeRoute - Navigation & Risk Rerouting System | *Software Developer* | *PHP, MVC*

- Developed an MVC-based navigation system for risk detection and safety rerouting; modeled system workflows, data flow diagrams, and backend routing endpoints.

GrammarSwitch - Interactive Language Learning App | *Mobile Developer* | *Flutter, Dart*

- Developed interactive grammar and parts-of-speech learning modules for an educational mobile application.

EDUCATION

National University Baliwag
Bachelor of Science in Information Technology
Specialization in Mobile and Web Application Systems

TECHNICAL SKILLS

Languages & Frameworks: Flutter, Dart, React, Next.js, TypeScript, PHP, JavaScript, HTML5, CSS3
Database & Backend: Supabase, PostgreSQL, MySQL, SQLite, RESTful APIs, RLS, Anonymous Auth
Tools & Deployment: Git/GitHub, Vercel, XAMPP,, Hyper-V, Cisco Packet Tracer,
System Design: Offline-first architecture, local caching, sync queues, ERDs, DFDs, ISO/IEC 25010 evaluation
Related Coursework: Mobile and web development, database management, networking, virtualization, Arduino/ESP32 microcontroller systems

COMMUNITY & EXTRACURRICULAR ACTIVITIES

Attendee & Participant | AWS Student Community Day North, National University Baliwag
Volunteer Participant | Community & Facility Building Initiatives
